Diagnostic Records (*Invisalign*)

The following diagnostic records may have been taken today:

- Impressions for Clincheck (*Invisalign*)
- Intraoral images (digital pictures of the teeth)
- Extraoral images (digital images of the head)
- Panoramic radiograph (x-ray scan of both dental arches)

The fee for these procedures also includes the next appointment when we “report” our proposed treatment. At this conference we will show you your **VTM** (virtual tooth movement) on Clincheck and go over alternative treatment plans, potential problems, and the expected cost of treatment. If comprehensive treatment is expected you will be asked to sign the **Informed Consent** form at that time signifying your acknowledgement of this conference and you having read: *Potential Problems and Limitations of Orthodontic Treatment*. Please review this form before the “report” visit so we may answer any questions you may have.

Insurance preauthorization is normally applied for after the report appointment, when we have all agreed on the proposed plan. Please bring any necessary forms with you so that we may assist you in filing.

If you have any questions, please feel free to call us any time. We would also like to reiterate our belief that the best possible orthodontic results come from a mutual understanding of the problems and treatment alternatives as well as a cooperative team approach between the patient, general dentist, and orthodontist. For this reason we will convey our findings to your dentist after the report appointment, and we expect that you will continue the regular scheduled cleaning and checkup visits with your dentist.
